### Sydney Harbour Boat Storage Expands Facilities

*Bellingham Marine recently completed construction of two concrete pontoons at Sydney Harbour Boat Storage in Belmain, Sydney; the new pontoons provide additional in-water staging and storage areas.*

Balmain, NSW, Australia – 21 July 2015 – Sydney Harbour Boat Storage is Sydney's only fully integrated boat storage, service, maintenance and fuel facility. Located in the heart of the harbour, Sydney Harbour Boat Storage offers deep water access for boats of all sizes, a boat lift with hard stand and undercover boat storage, and a complete range of light maintenance and service facilities. Recently completed marina arms by Bellingham Marine offer in- water storage for a range of large commercial or recreational boats with direct access to fast flow fuel and pump out facilities.

According to facility's Operations Manager, Bellingham Marine was chosen for the project due to their market leading marina products that are renowned for durability and quality of finish. "Being located in the Harbour and with the requirement to accommodate large commercial and recreational boats we needed a well designed and constructed marina that could handle the traffic and last for many years," said Sydney Harbour Boat Storage Operations Manager Jeremy Rose. "We've contracted with Bellingham for other stages of our marina and there really was no alternative when considering the construction of our new marina, they are the best in the business."

The marina construction completed to date has been done in two stages. The first stage was a vessel queueing area adjacent to the straddle carrier northern arm. The second stage completed May 2015 skirts along the shore and the southern straddle carrier arm. The marina arms are serviced with firefighting equipment and Marine Technologies 'Sterling' service units providing power and water to the vessels. As with all Bellingham Marine projects the marina arms were designed specifically for the location.

Boat storage clients at Sydney Harbour Boat Storage enjoy great value storage packages, brand new reception and waiting facilities and stunning views of the city skyline. Unlimited boat lifts and complementary fresh water engine flush and wash down for all clients make boating from Sydney Harbour Boat Storage simply a pleasure.

Conveniently located next to the new Cruise Ship Passenger Terminal at White Bay, Sydney Harbour Boat Storage is easily accessible via main arterial roads from all areas of Sydney, offering secure waterfront car parking facilities for tenants and visitors.

As the world's leading marina design-build construction company, Bellingham Marine specializes in pontoon, floating platform and floating wave attenuation systems for marinas worldwide. The company also produces dry storage systems for the upland storage of boats.
